

CAST STEEL DOUBLE DISC METAL SEAL PARALLEL GATE VALVE

Design

Cast steel gate valve are designed and manufactured to provide maximum service life and dependability. All gate valves are full ported and meet the design requirements of American petroleum Institute Standard API 600 & API 6D, British Standard BS 1414 & BS EN 1984 and generally conform to American Society of Mechanical Engineers Standard ASME B 16.34. Valves are available in a complete range of body/bonnet materials and trims.

Available Modifications For

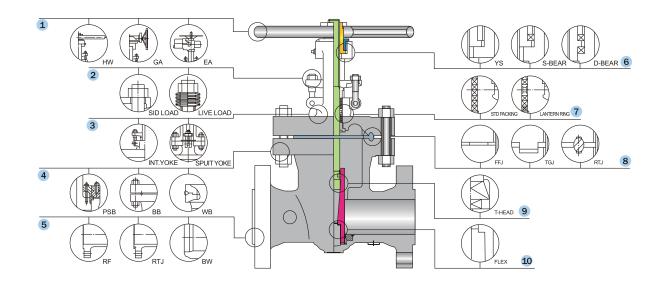

Cast Steel Valves

- * Trim changes
- * End connection Modifications
- * Packing and Gasket Changes
- * Operator Mounting
- * Handwheel Extensions

Rang of Materials

Standard body/bonnet materials include nine grades of carbon, low alloy and stainless steels. For special apolications they can be supplied in other grades of alloy and stainless steel. There's a full range of trim materials to match any service. Optional packing and gasket materials are available for a full range of service conditions

- * Pressure Equalizing
- * By-pass
- * Customer specified Coatings
- * Weld End Bore Changes
- * Oxygen & Chlorine Cleaning & Packaging

Operating

Large hand wheels for easy operation. Also available with gearing, motor actuators, pneumatic or hydraulic actuators for more difficult services

3 OS & Y

Outside Screw and Yoke. Cast steel gate valve voke. Integral with bonnet for 150lLb-8",300Lb-8", 600Lb-6", 900Lb-4" & Small

5 End Connections

A choice of Flanged, RTJ flanged or Butt welding end for piping flexibility

Lantern Ring and **Double Packing set**

Lantern ring with leak-off fitting connection and double packing stack is optionally available for critical services.

9 Stem

All wedge gate valves are provided with upset forged T-head stems. By forging the T-head, the stem at the stem-wedge connection is stregthended. This design also allows the wedge to self-align, eliminating the possibility of a bent stem jamming the wedge.

2 Live Load Packing 4 BB

In services requiring frequent cycling or with high pressure/ temperature variations, live loading extends the service life between maintenance periods by requiring less frequent packing gland adjustments. Belleville springs are employed to provide constant packing gland stress

Bolted bonnet. Welding bonnet and pressure seal bonnet in services requiring frequent cycling or with high pressure/temperature variations

6 Yoke Sleeve

Extra long thread engagement between yoke sleeve and stem provide long thread life. Valves of sizes larger than 150Lb-12 " 300Lb-10 " ,600Lb-6 " 900Lb/1500Lb/2500Lb-4 " are regularly provided with roll bearing yokes.

A flat face gasket joint is used in the 150Lb valves. A male and female joint is used in 300Lb to 600Lb valves. Ring joint is used in the body to bonnet connection in 900Lb & higher rated valves

The sealing construction of Double disc parallel gate valve is adopt the type of "v" with leading to disc, the specil of this type is service to high temperature

CAST STEEL DOUBLE DISC METAL SEAL PARALLEL GATE VALVE 150Lb

CAST STEEL DOUBLE DISC METAL SEAL PARALLEL GATE VALVE 1500Lb

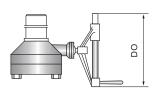

Applicable standards:

STEEL GATE VALVES, API 600/API 6D STEEL GATE VALVES, ISO 10434/ISO 14313 STEEL VALVES, ASME B 16.34 FACE TO FACE, ASME B 16.10 END FLANGES, ASME B 16.5 BUTTWELDING ENDS, ASME B 16.25 INSPECTION AND TEST, API 598/API 6D

Design description:

PSB, PRESSURE SEAL BONNET
"V" WITH LEADING TO DISC
RENEWABLE SEAT RINGS
FORGED T-HEAD STEM
RISING STEM AND NON-RISING HANDWHEEL
FLANGED OR BUTTWELDING ENDS
AVAILABLE WITH BG OPERATOR
