

Mpumalanga

Ngodwana, Mpumalanga

VENUE:	Ngodwana Training Centre
DATE:	22 August 2024
TIME:	12:00 to 16:00

Another paper and pulp facility owned by Sappi, the Ngodwana Mill is located near the city of Mpumalanga and has been operating for over 50 years. The mill produces paper grade pulp for its own and market consumption and newsprint, containerboard and dissolving wood pulp.

The mill produces 330 000 tons of paper pulp for its own consumption, 210 000 tons of dissolving wood pulp and 380 000 tons of paper (newsprint and kraft linerboard used for packaging) per year. The majority of the mill's products are exported.

With more than 1 000 employees and 700 contractors, Ngodwana Mill has undergone numerous significant expansions including the addition of two paper machines, a coal-fired power boiler and a dissolving wood pulp plant.

Visitors:

Name of operation	Type of operation	Owner of operation	Commodity
Ngodwana Mill	Paper and pulp mill	Sappi	Paper

MTE cannot ignore the broad and diverse range of industries in this area. As such, we encourage businesses outside of the scope of mining to join in the exhibition. These include businesses involved in the sugar and forestry industries. Sappi Ngodwana is an ideal area to incorporate these industries.

Exhibitors we would like to see include companies that supply equipment or products to the paper and pulp industry. Other expertise relevant to this expo would include head to foot personal protective clothing, suppliers of cooling towers and heat exchangers, product movement and transfer services, abrasives, instrumentation, conveyor chains, forestry equipment, lubrication products and cable accessories.
